

# Harsh Kumar Jangid

Passionate and detail-oriented frontend developer with 1.9 years of experience in creating responsive, user-friendly web applications and mobile apps. Proficient in HTML, CSS, and JavaScript, with expertise in Bootstrap for building mobile-first designs. Experienced in Angular for developing dynamic single-page applications and Ionic for cross-platform mobile app development.

## Work Experience

### Benepik Technology Private Limited

June-2023-present

#### Gifter Clone

- Developed a Gifter clone website within my current company, showcasing proficiency in HTML, CSS, Bootstrap, and Angular.
- Demonstrated commitment to continuous learning and innovation within the organization through project execution, enhancing overall efficiency by 20%.

#### Award Nomination

- Developed an award nomination platform using HTML, CSS, Bootstrap, and Angular, incorporating full dynamically and API integration.
- Achieved a 30% increase in efficiency through streamlined processes and optimized functionalities.

#### Kit Management system

- Engineered an intuitive Kit Management system with a robust admin panel utilizing HTML, CSS, Bootstrap, and Angular.
- Streamlined admin functionality to enable efficient kit management, utilizing Angular's capabilities for real-time data integration.
- Implemented API integration within Angular for seamless updates, ensuring administrators have access to the latest information for effective decision-making.

#### Spin The Wheel

- Engineered a fully customizable spin-the-wheel game that dynamically adapts to user preferences with minimal configuration.
- Developed advanced control mechanisms, allowing for precise targeting of specific sectors through programmable stop points.

#### Benpik.com

- Created a fully responsive WordPress website with seamless functionality, ensuring optimal user experience across devices.
